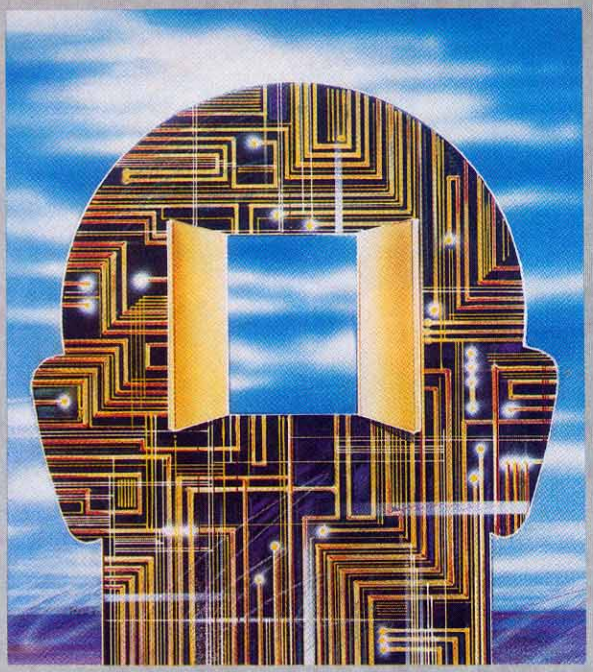
## *ARTIFICIAL INTELLIGENCE*

***"That's right! Expert Systems, the artificial intelligence tool for business, industry, and problem-solving. The latest in knowledge engineering."***

# EXPERT OPINION™



Fifth-generation. Artificial intelligence. Now, with **EXPERT OPINION,** you can be creative in this growing new field...without having to learn a complicated language like Prolog or Lisp.

### Be The First...

**EXPERT OPINION** is the *first* general-purpose expert system creation package for the Atari ST. Expert systems are collections of natural language rules that you create, database-style. Your "knowledge bases" can be about any subject. **EXPERT OPINION** will give you new insight and advice about your expertise. And, because **EXPERT OPINION** uses the GEM interface, the system is remarkably simple to use. Currently, expert systems are used in the fields of medicine, computer science, economics, and geology.

YOU CAN BUILD YOUR OWN KNOWLEDGE BASE WITH THE INCLUDED MANUAL AND SUGGESTED SUPPLEMENTARY READING MATERIAL.

### Mainframe Power In Your ST...

Once you've built your knowledge base, **EXPERT OPINION** is easy-to-use because it's based on a powerful natural language interface, so you can give your input—and get your answers in plain English. Plus, it is the only expert system presently available for micro-computers which can clearly explain why a particular question is being asked (it backtracks up to 10 levels).

**EXPERT OPINION**'s "inference engine" solves problems three ways:

- ☐ **DEDUCTION**—Use this mode if you have some initial data about the problem (also known as Forward Chaining).
- ☐ **VERIFICATION OF A HYPOTHESIS**—Your computer asks you questions about your hypothesis (also known as Backward Chaining).
- ☐ **EXPERTISE** (totally new technique)—A combination of the above, for situations where you have no initial data about the problem, and no hypothesis (Mixed Chaining Mode).

**EXPERT OPINION** features:

- ☐ Dictionary linked to each knowledge base.
- ☐ Unlimited number of knowledge bases.
- ☐ BaseManager has powerful tools for creating and editing knowledge bases.
- ☐ Illustrated manual includes tutorial and tips by Christopher F. Chabris, Glossary, Bibliography, and more.
- ☐ GEM-driven interface, on-line [Help], and user-friendly command structure make **EXPERT OPINION** simple to use.

**FREE BONUS!**
Comes with example knowledge bases on disk to get you started.

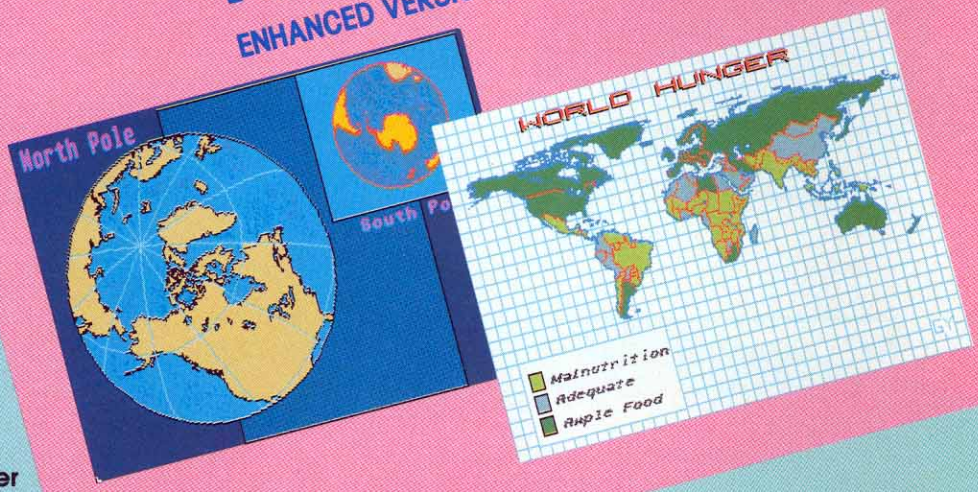
# MAPS AND LEGENDS™ The Cartographer

## ENHANCED VERSION 2.0



*by Harry Koons and David Chenette*

Put yourself anywhere in the world — even your own hometown. And now view that land mass from any altitude—in full perspective!

### Unlimited Versatility

The *new* OVERLAY feature in version 2.0 gives you total flexibility and professional power. Now, *plot your own maps in scale on top of the built-in world map database.* Or use the new DATAMAP disks to add the boundaries of the nations of the world, historical maps, and more.

### Tap Your ST's Speed...

Using advanced CAD system algorithms, MAPS and LEGENDS takes less than a minute to do what used to take hours for computers—and weeks by hand. It features ultra-fast drawing of world maps from one of 11 perspectives, three resolutions, up to 16 colors.

**ENTIRELY GEM-BASED FEATURES INCLUDE:**

- ☐ OVERLAY option for plotting your own maps, flight plans, routes, city locations, etc.
- ☐ BUILT-IN DRAWING TOOLS
  - Multiple Pattern Fills, Pen sizes, Text sizes, Fonts
- ☐ MULTI-FONT DESK ACCESSORY
  - Comes with extra fonts for customized legends
- ☐ AUTO-LOCATE MODE
  - Reads geographic coordinates from map, and distance and bearing from any point on the Earth—just by pointing with your mouse!
- ☐ DEGAS and Neo compatible. Use your maps as basic elements in the most popular ST graphics packages.
- ☐ Works with color and monochrome systems.
- ☐ Built-in topic-based [Help] system.

NOTE: With the new overlay enhancement, MAPS and LEGENDS has become one of the *best* cartographers tools in history. We added this capability to the system after a request for it from a navigational flight officer. He told us that he and the other flight officers at his base were using MAPS and LEGENDS and ST's to draw their flight plans, and that they needed to be able to accurately plot their routes. We liked the idea so much that now anyone can build custom map databases out of simple coordinate lists. And arguably the best thing about version 2.0 is the price...still $34.95.

***Sixty Eight K Assembler, Editor, Debugger combo for under $35.00!***

# A-SEKA™ by Kuma

## Version 1.6

*By Andelos Systems/Kuma, UK*

Sometimes you just need to get that code running faster. A high-level language application needs a burst of energy. Or maybe it's arcade action—high end stuff. A-SEKA does it *fast,* because it is all in RAM. All of it: The Assembler, Editor and Monitor/Debugger. Those who know how can create exciting codes mighty fast. And if you're learning Assembly, you won't ever have to wait for your latest attempt to go through the assemble and link process.

A-SEKA assembles source codes at over 30,000 lines per minute! And since it can assemble and link simultaneously, you can *run your code instantly.* Of course, A-SEKA is also a macro assembler and uses standard Motorola mnemonics. But what really sets it apart is its powerful machine language monitor, disassembler and symbolic debugger.

**FEATURES:**

- ☐ Symbol table access.
- ☐ Arithmetic operations. Input in any base.
- ☐ Disassembles 16 lines at a time.
- ☐ Motorola mnemonics.
- ☐ Single step. Trace.
- ☐ Multiple breakpoints. Memory inspect and modify.
- ☐ Line assembler.
- ☐ Examine registers.

**VERSION 1.6 ENHANCEMENTS:**

- ☐ Full-screen editor, including cut & paste
- ☐ Expanded GEM AES and VDI libraries
- ☐ Compatibility with other assembler source code
- ☐ Support for GEM subdirectories, additional pseudo-op's for printer and Line A control
- ☐ Step command now skips trap and Line A OS calls

**ST0216** **$34.95**

NOTE: We're carrying both the SEKA and GST-ASM assemblers because they are complimentary—each is designed to meet the needs of a different type of programming. SEKA is a low-level assembler that is most useful for programmers who like to work entirely at the machine level or want ultra-fast response time. GST-ASM is really a professional developers tool—its extra GEM features and GEM environment make it the perfect assembler to use with any high-level language.

*FINALLY! GEM DEVELOPMENT AND LEARNING TOOLS AT A SUPER VALUE!*

# GSTC™ Compiler

**Version 1.3**

## Here is the compiler that 1ST WORD was written in.

Do you want to write GEM-based programs for the Atari ST? With GSTC you can—without spending hundreds of dollars on expensive compilers. Now you can add windows, dialogs, and all the GEM forms to any program — it's *easy* with GSTC. Use your mouse and pull-down menus to write C programs within a desktop menu-driven "shell" environment. GSTC allows compile-assemble-link and assemble-link operations to be batched, avoiding tedious and error-prone command line entry. And it all fits on one single-sided disk. No excessive disk swaps.

At the heart of the GSTC package is the remarkable *GEM Superstructure Library.* This enables the beginner to write GEM applications software at once, without the complex learning curve associated with GEM AES and VDI. Open a fully-functioning window with one call. GSTC is fast—providing compile and linkage turn-around times speedy enough for the most impatient hacker!

**GSTC features include:**

- ☐ GEM Text Editor (GST EDIT)
- ☐ Linker (GST LINK)
- ☐ C Compiler
- ☐ GEM "shell"
- ☐ 68000 Assembler
- ☐ GEM Superstructure Library
- ☐ GEM bindings, (Standard Unix, GEM VDI, GEM AES, GEM XBIOS, TOS)
- ☐ Comprehensive printed user manual

**Version 1.3 enhancements**

- ☐ All 40 GEM XBIOS routines, with documentation
- ☐ All 12 GEM BIOS routines, with documentation
- ☐ Hints and Tips on using pointers to simulate structures
- ☐ FRACTAL FACTORY object code

**TH9018** **$79.95**

NOTE: We searched all over the world to find the best introductory C compiler. When we discovered that GSTC was used to write 1ST WORD, we decided that it was just what we were looking for. This compiler is very powerful and remarkably easy to use. But at present, it doesn't have structures or a floating point library. To help you here, our version 1.3 of the GSTC documentation includes information about how to simulate structures with pointers, and the FRACTAL FACTORY disk has a math library on it. If you're writing a program that uses very serious math, you may need to look at Lattice C. But for most applications, GSTC will do the job.

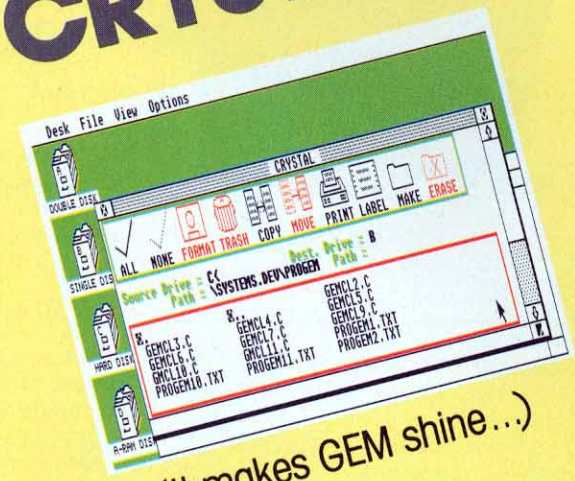
ADD A WORLD OF DOS ICONS TO ALL OF YOUR GEM PROGRAMS.

# CRYSTAL™



(It makes GEM shine...)

*By Jim Thompson*

These are the DOS Icons Digital Research forgot when they wrote GEM. It's too bad Atari didn't put **CRYSTAL** into the TOS ROM's, because for less than 30K of code, **CRYSTAL** gives TOS the most powerful features of MS-DOS. Plus, you never lose the look and feel of GEM. And since **CRYSTAL** is a desk accessory, it's always available.

In fact, these eight icons will eliminate all the frustration you feel from not having powerful DOS functions available from within your favorite GEM program (or the desktop).

Of course, **CRYSTAL** is compatible with all monitors, all disk drives, and all printers.

Make your personal version of GEM shine—for $24.95.
